CAREER OBJECTIVE

Motivated Core Java Developer with strong expertise in designing and developing RESTful APIs and backend applications. Skilled in building secure, efficient, and high-performance systems with a focus on reliability and scalability. Experienced in collaborating with cross-functional teams to deliver innovative solutions using Agile methodologies. Proficient in Core Java, Java-based frameworks, and modern software development practices. Enthusiastic about contributing technical expertise and problem-solving skills to create impactful applications, with additional exposure to Angular UI for full-stack collaboration.

EDUCATION

B.Tech Computer Science and Engineering
Sir C.R.Reddy College of Engineering ,Eluru

CGPA-8.0
2021 -2025

Technical Skills

- | | |
|------------------------------|--|
| • Frontend technology | HTML5,CSS3,JavaScript |
| • Programming | c ,c++ |
| • Backend technology | python,java,spring ,springboot ,Rest Api |
| • Database Technology | MySQL,Sql |
| • Tools | VS-code , gitHub,pycharm,MS-office,Eclips, |
| • Methodology | Agile,SDLC |

Projects

Car Pooling System

- Built a car pooling system to match drivers and riders based on location and time
- Implemented secure login, ride creation, and search features using Java
- Achieved 85% match success rate in test scenarios
- Reduced commute costs by ~30% through shared rides
- Designed responsive UI for mobile and desktop users

Store Demand Forecasting :

- Built ML model to forecast daily store demand using historical data
- Achieved 92% prediction accuracy with regression techniques
- Reduced overstock by 25% and stockouts by 18%
- Automated demand reports for 50+ stores
- Improved supply chain efficiency by 15

Color Detetion

- Developed a real-time color detection tool using Python and OpenCV
- Used ML algorithms (KNN, Decision Tree) to classify colors by RGB values
- Achieved 90%+ accuracy across diverse image samples
- Integrated interactive UI for instant color name display

Internships

- **Internpe**

Completed a Java development internship at InternPe, focusing on core concepts and practical implementationBuilt mini-projects using control flow, string manipulation, and user input handlingStrengthened debugging skills and gained hands-on experience with real-world Java applications

- **Salesforce Administrator**

Configured and customized Salesforce CRM, managed user accounts, and created reports. Supported data management and troubleshooting for end-users. Documented processes and developed user guides to improve efficiency.

- **NIT**

Built and maintained pages using HTML, CSS, and JavaScript for internal use.Gained hands-on experience in deploying secure, user-friendly web interfaces for public service

CERTIFICATIONS

- **webDevelopment (Basics)** - Earned a Web Development certificate from NIT (National Information Technology)
- **core java** - Earned a Java programming certificate from Interpa, gaining hands-on experience in core concepts and practical implementation.
